

Example of Sketching:

(You need to annotate your sketch to show and explain all features of your **2 design sketches** e.g. give some idea of the materials, size, shape, colour, etc you will use)

E.g This is my sketch of my horse. I want this to be made out of wood or metal. I would like it to be about 60cm x 80cm in size. I want it to be a nice brown colour. A warm brown colour.

Add actual measurements & some colour onto your drawings and scan and upload into your assessment doc.

Comment on why your design/s are like this and choose 1 design to go ahead with.

I am going to make Design 1 because it is the one my stakeholder likes the best and it also is going to be the right size and colour for our backyard. I love horses and have always wanted a pony. I like this one as it will be easy to cut on the bandsaw and if I make it out of wood I can paint it a nice colour. I don't want the bridle on it though as that will be too hard to add unless I do it with some string at the end.
