

## Physical Properties

Here are some physical properties that you can use to describe an object.

**Colour** - has a particular colour eg red, silver, blue, orange, shiny, dull etc. or is colourless

**Shape** - round, square, symmetrical, irregular shape etc. or no shape

**State** - solid, liquid or gas

**Smell** - has a smell or is odourless (no smell)

**Texture** - smooth, hard, rough, bumpy, soft etc.

**Amount** - is measurable or not (can be counted or measured in some way)

**Weight** - has weight or is weightless

**Volume** - space it takes up

**Write down** (on a doc/paper) **the physical properties of the following objects using the information above. The first one is done for you as an example.**

1. Silver - shiny silver, metal, can be made into a particular shape, has no smell of its own, hard, can be measured, has weight and volume
2. Apple
3. Steam
4. wood
5. Honey
6. Leaf
7. coin
8. Gold
9. Key
10. Glass
