

## **Alien Attack**

Zirgog is a creature from another galaxy. This creature has some strange features. It has a retractable sail on its back that contains large green structures similar to the green pigment, chlorophyll, found in plants. It also has: wings on its back; webbed front feet; a blow-hole on top of its head; eyes on retractable stalks; and hind limbs that can grow extensions into the soil.

Complete the following Questions in a document

1. Is Zirgog a plant or an animal?
2. What kind of habitat would Zirgog live in?
3. List the physical features/ adaptations of Zirgog.
4. Classify the physical features/adaptations of Zirgog into Structural, behavioural or physiological adaptations in the below given table.
- 5.

Structural/Physical	Behavioural	Physiological

6. State the function of each adaptation.

Note: You can use the following questions to help you think about the functions of the adaptations.

- a. How does the creature move?
- b. How does it breathe?
- c. How does it get its food?
- d. How does it defend itself from predators?
