

Million Dollar Arm

T= The main idea of the film 'The Million Dollar Arm' was Determination, Failure and Success.

E= We see Two boys Succeed against all odds. After failing multiple times there chances of success were thin but Rinku and Dinesh were determined to carry on the will of the two boys were spatacular.

X= For example after seven months Rinku and Dinesh had their first professional try out and failing to succeed in front of 20 Major League Scouts JB was determined with confidence to give the boys a second chance after seeing how sad and disappointed the two boys were. The two boys apologised for failing Jb and at that point Jb realized he failed them. Before Jb met the boys he was all about money girls and fame, Rinku and Dinesh succeeded in making Jb a better person even tho they failed their first professional tryout. After meeting the boys Jb is now a better person for example he even traded his Porsche for a Minivan and committed into a long term relationship with Brenda.

A= Success is often determined by determination. These boys were not ready to give up after boys asked Jb for a second chance they were determined to be the first indian baseball players in U.S.A.

S= In conclusion these messages supported the main ideas of this film by showing failure determination and success this move proves my point that 'Failure Leads To Success'. failing the first time, they were not ready to return to India to be a part of the Indian Army. The

T= One of the best used visual technique shots was a Medium Close Up Shot and a Bird's Eye View shot. There were many shots but these two stood out the most.

E= These two camera angles represented and contributed in showing the Determination, Failure and Success in the movie 'The Million Dollar Arm'. The Medium Close Up Shot and the Bird's Eye View shot were the best techniques used to support my message.

X= For example in the scene were Amit had to go talk to Rinku and Dinesh before their second professional tryout the two camera shots visually displayed Determination especially when amit said "I'm seeing my dream in both of you, Your victory is my victory". After Rinku pitched his first ball "**BANG**" the scout shouted "That's 93 mph" you could feel the relief of success the intensity was crazy Rinku and Dinesh knew at that point that they had succeeded in being the first indian baseballers although the main idea for the two boys was not to fail JB.

A= These two shots helped display different emotions in the scene such as the medium close up shot, this shot was in charge of displaying emotion and the different types of expressions on their faces. Despite all of that, The Birds Eye View shot was visually there to show the determination of the movie when the boys were training and learning to pitch you could see

the determination shown by this particular shot. These shots also showed the amount of failure the boys went through before they faced success as well as being newbies at the sport.

S= In conclusion to this paragraph these camera angles supported the main messages and ideas of this film by showing failure determination and success using various visual techniques.

T= The director used various types of verbal techniques and sound the one that was the most attention catching was the music used to set the mood.

E= A huge variety of music was shown in the movie. From setting the mood to show the contrast from different expressions. From sad to happy and through thick and thin you could tell what the scene was set too because of the supporting music behind every scene. In the specific scene where Amit was told to talk to the boys before their professional tryout the music set there was made to set the scene to get the audience in a dramatic mood by showing determination.

X= For example because the boys are Indian the movie used both American Tracks as well as Indian tracks. When Amit was told to talk to the boys you could hear the soft inspirational music building up by the director increasing the pitch. The climax of that particular scene was breathtaking the tempo used to describe the different emotions were accurate.

A= The music used to support my main ideas was really exhilarant. The various types of verbal techniques used generated an inspirational mood that's why this movie was appreciated by the general viewers.

S= Overall the soundtrack used behind some specific scenes were accurate because the music helped support the three main messages.

T= My most favoured part of the movie was the climax when both Rinku And Dinesh pitched well over 90 mph after failing multiple times before and later went on to sign with the "Pittsburgh Pirates".
