

Clean-up Data Collection

Number of volunteers involved:

Duration of collection event:

Date:

Location:

| *Specify whether data is a weight (kilograms) or an estimated volume (litres). | | | | | | |
|--|--|------------------------|------------------------|------------------------|------------------------------|--------|
| Primary Category | Secondary Category | *Weight or est. Volume | *Weight or est. Volume | *Weight or est. Volume | *Weight or est. Volume | *Total |
| Paper | Recyclable paper - office paper, shredded paper, newspapers, magazines, printed materials. | | | | | |
| | Cardboard - cardboard boxes etc. | | | | | |
| | Compostable paper - paper towels, serviettes, non-waxy food bags and wrappers, moulded paper e.g. egg cartons, take-away drink trays | | | | | |
| Plastics | Recyclable plastics - plastics 1-7 with recycle triangle. | | | | | |
| | Non-recyclable plastics | | | | | |
| | How many single use plastic bags were found? | | | | | |
| Metals | Steel cans, aluminium cans, clean aluminium foil | | | | | |
| Glass | Glass bottles and jars (unbroken) | | | | | |
| All other waste not applicable to above | | | | | | |
| *Hazardous/Dangerous waste | | | | | | |
| | | | | | Total in kilograms or volume | |

* Hazardous waste should not be landfilled but disposed of in an appropriate manner at your transfer station or through an e-waste facility. We advise not to handle hazardous/dangerous waste during OSOF events, however take note of waste/location and advise the OSOF coordinator on the day, or your local city council.

Tracking your Trash

Fill in the table below with 10 different types of trash you found on the beach. In each instance decide if and why could be harmful.

| Item | # collected | Harm rating (1= rarely 2 = sometimes 3 = very harmful) | | | |
|-----------------|----------------|--|------------------------------------|-------------------------------------|-----------|
| | | Animals | People | Boats | Places |
| Eg: Fishing net | 2 small pieces | Entanglements | Divers could be entangled if large | Net could wrap around the propeller | Unsightly |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |
| | | | | | |

Plastic items being found by the Northern Royal Albatross at their Taianua head nests include squid lures and plastic fishing floats. A hair curler and marlin bait box packing tape were found in the stomach of a petrel that washed up on one of the Otago Peninsula beaches.
