

Skills Work: Line Graphs

Instructions:

1. Decide which of your data will be shown on the Y axis and which on the X axis.
2. Identify your highest figure for the Y axis.
3. Decide on your scale for the X axis. This must be divided into regular intervals.
4. Draw the X and Y axes.
5. Label the axes.
6. Plot on the graph your information using dots – Each dot must be directly centred above the year / month etc. it represents.
7. Join the dots with a line.
8. Add a key if required (e.g. if there are two different coloured lines plotted on the graph).
9. Give your graph an accurate title.
