

# Business Logo

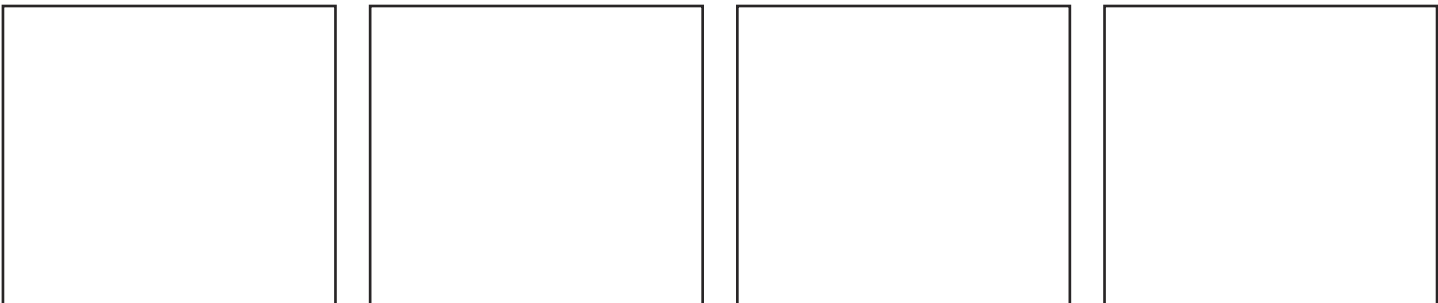

I can design a professional logo.

**Create a logo for your business. Every piece of work that you complete should be branded with this logo.**

Draw famous logos below. What do you notice? Are they simple? Do you recognise them straight away? Do they include the company name or a slogan?

Design a logo for your own company or business. Include your business name, a simple picture and a catchy slogan. Use the boxes below to try out a few ideas. When you are happy with your final logo, tick your final design.

Your challenge is to now recreate your final logo several times, ensuring that they look as identical as possible. When you have completed your logos, cut them out and stick them onto any pieces of work related to your enterprise project.
