1. Define what climate change is.

2. In 3-5 complete sentences, describe what issues are involved with climate change. Why is this topic important? Why does it matter that some people don't believe in climate change?

answer:

3. What is the side against climate change saying? use your research skills to identify some of their arguments, you may use point form.

4. What is the side in favour of climate change saying? use your research skills to identify some of their arguments, you may use point form.

5. Compare and contrast, write a **paragraph (5 sentences)** that compares and contrasts the two sides to climate change. How are they the same and how are they different?
