

Hazard Symbols Match and Draw

Hazard symbols are used to warn us about the potential hazards of a substance.

Draw one line from each symbol to the meaning of that symbol, then draw one line from each meaning to the correct description.

Symbol	Meaning	Description
	<input type="text" value="flammable"/>	<input type="text" value="Could cause illness or death if taken into the body."/>
	<input type="text" value="moderate health hazard"/>	<input type="text" value="Catches fire when it comes into contact with oxygen and a heat source."/>
	<input type="text" value="corrosive"/>	<input type="text" value="Could irritate the skin."/>
	<input type="text" value="harmful to the environment"/>	<input type="text" value="Could cause damage to animal and plant life if released into water systems."/>
	<input type="text" value="serious health hazard"/>	<input type="text" value="Could burn the skin and damage the eyes. Avoid breathing in vapours."/>

Hazard Symbols Match and Draw

Hazard symbols are used to warn us about the potential hazards of a substance.

Draw one line from each symbol to the meaning of that symbol, then draw one line from each meaning to the correct description.

Symbol	Meaning	Description
	flammable	Could cause illness or death if taken into the body.
	moderate health hazard	Catches fire when it comes into contact with oxygen and a heat source.
	corrosive	Could irritate the skin.
	harmful to the environment	Could cause damage to animal and plant life if released into water systems.
	serious health hazard	Could burn the skin and damage the eyes. Avoid breathing in vapours.
