

1.

O is the centre of the circle shown.

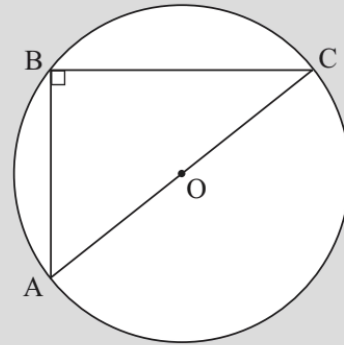

- a** Name the line which is the diameter of the circle.
- b** Name any lines which are radii of the circle.
- c** Name any lines which are equal in length.

2.

Using the diagram given where O is the centre of the circle:

- a** Name a radius of the circle.
- b** Name a diameter of the circle.
- c** Name two line segments that are equal in length.
- d** Name an angle which measures 90° .

3.

Using the diagram given:

- a** name the centre of the circle.
- b** What type of angle (according to size) is the angle marked ●?
- c** What special figure is QOR?
- d** What type of figure is PQRO?
