

Materials

Materials

- *We use wood, metal, plastic, glass and fabric to make most everyday objects.*
- *Different materials have different properties.*
- *Materials can be natural or humanly-constructed.*

Here are a few facts about some materials...

Wood

- Wood is a natural material. It comes from trees.
- A few things made from wood are:

furniture

boats

instruments

paper

- Wood is used as it can be carved in to any shape, is strong and has a very nice appearance.

wood

Fabric

- Fabric comes from plants and animals.
- A few things made from fabric are:

curtains

clothes

towels

- Fabric is used as it is very light, warm, soft and quite easy to produce and sew.

wool

Plastic

- *Plastics are humanly-constructed, mostly from oil.*
- *A few things made from plastic are:*

balls

bottles

carrier bags

- *Plastic is used as it can be made to be flexible, hard, rough or smooth. It is also very cheap to produce and easily washable.*

plastic

Metal

- Metals are made from rocks. The rocks are dug up and taken to a factory where they are heated and processed into metal.
- A few things made from metal are:

jewellery

cutlery

cars

- Metal is used as it is strong, hard, smooth and easily washable.

metal

Glass

- *Glass is made from very fine sand. It is heated until it melts.*
- *A few things made from glass are:*

bottles

light bulbs

glasses

- *Glass is used as it is strong, hard, smooth, easily washable and transparent.*

glass
