

## Understanding Food Webs and Food Chains

### Woodland food web

- 1) Which organisms are producers?
- 2) Which organisms are top predators?
- 3) What does the vole eat?
- 4) Locate all the food chains and write them out (hint: there are six)

### Seashore food web

- 1) How many primary consumers are there?
- 2) How many secondary consumers are there?
- 3) What does the dog whelk eat?
- 4) Who eats barnacles?
- 5) Draw a food chain with five links from the food web.
- 6) What would happen if the starfish died due to pollution?
  - What would happen to the number of mussels?
