

P:Describe our theme

The definition of this is the way that father and the sons come across each other throughout the movie.

E,D:Event that shows in the theme

The relationships between boy and his father were good until boy wore Alamein's jacket. When boy wore Alamein's jacket he got really mad and started hitting boy knowing that his son sees him as a role model. From that incident onwards, boy lost respect for his seeing that he's such an angest who got mad at him just because he wore his father's jacket.

A:Techniques

There Are many different shot angles in the film,such as when he worn his father's jacket and he also found the treasure(a bag of money)he hold the money walked in the store very confidence/proud,this scene used medium shot angle to show that boy was engaging. There was another shot angle was when does Alamein came back with angry for boy worn his jacket,in that scene was showing Alamein came to the boy with a shape angle shot.

How does this relate to the society

In this film we can see that the boy trusts Alamein (his father) blindly and will do anything to make him feel proud but Alamein is not worthy of that trust because he lied to his son that he's in Japan when he was actually in jail. In society, people are always need to set expectations to reach their goal.
